Security

The PowerTags positioning Tag with duress button is an active RFID Tag that provides real-time supervision and tracking for personal

The Tag has two configurable buttons which enables the real-time notification of warnings with the tag's location to a variety of media's that includes computer stations, mobile via audible alarm, email or SMS

The system provides the staff ID & location in case of emergency, which gives each employee the security and the confidence that they are protected at all times.

The buttons usage can be configured via a centralized management system to perform the different operations.

The Tag contains a tilt detection sensor that enables the detection of tiny movements and increase the transmission interval to achieve better positioning while in motion

Main Features

- RTLS technology
- General purpose duress button
- Bracelet or pedant wearable tag
- 24/7 location tracking supervision
- Room Accuracy & floor separation
- Tilt sensor
- Long battery lifespan
- Long range transmission up to 100 meters indoors
- Comprehensive management system
- Easy to use & user friendly
- Cost effective

How does it Works

- Each employee is given a duress bracelet which has a specific ID no.
- The tag is configured & paired with the employee ID and using the management system
- Readers are installed within the floors / rooms of the facilities
- The bracelet transmits it's ID via the repeater to the management system which pin-point the location of each staff member at real-time
- When the duress button is pressed the system sends an alert of the ID and the employee location

PowerTags Staff Tracking unique advantages:

- Real Time map view of all employees, including movement from one room to another
- Accurate real-time location, with room and floor separation, to eliminate false alerts and calls
- Reports of historic movement of each employee to analyze events
- Simple maintenance, Tags with up to 3 years battery life
- Minimal TCO, simple installation and attractive prices

System Info

QUICK & EASY SETUP

Easily install sensors and gateway and be up and running in minutes

ACTIONABLE ALERTS

Receive timely alerts via phone, email, and sms text

LONG RANGE WIRELESS SENSORS

Narrow band wireless range for monitoring facilities up to 400 meters

LOW POWER-LONG LIFE SENSORS

Sensors with low power consumption providing up to 5-year battery life

SENSOR MAPS

Upload facility maps and visualize sensor location and readings

ANALYTICS & REPORTING

View temperature and notifications logs, plus run and schedule reports

TEMPERATURE LOGGING

Automatically records and stores temperature logs

REMOTE MONITORING

Free mobile app to access temperature status from anywhere

SECURE CONNECTION

Secured end-to-end data and polivacy
